Cheat Sheet

http://www.phpdoctrine.org

Doctrine Facade

```
$models = Doctrine::loadModels($modelsPath);
$models = Doctrine::getLoadedModels();
Doctrine::generateModelsFromDb($modelsPath);
Doctrine::generateYamlFromDb($schemasPath);
Doctrine::generateModelsFromYaml($schemasPath, $modelsPath);
Doctrine::createTablesFromModels($modelsPath);
Doctrine::generateSqlFromModels($modelsPath);
Doctrine::generateYamlFromModels($schemasPath, $modelsPath);
$results = Doctrine::createDatabases();
$results = Doctrine::dropDatabases();
Doctrine::dumpData($fixturesPath);
Doctrine::loadData($fixturesPath);
Doctrine::migration($migrationsPath, $versionNum);
Doctrine::generateMigrationClass($className, $migrationsPath);
Doctrine::generateMlgrationsFromDb($migrationsPath);
Doctrine::generateMigrationsFromModels($migrationsPath, $modelsPath);
$modelNameTable = Doctrine::getTable($modelName);
Doctrine::compile('/path/to/doctrine/lib', array $drivers);
Doctrine Manager::getInstance()->setAttribute($attribute, $value);
$conn = Doctrine Manager::connection($dsn, $connName);
$conn = Doctrine Manager::getInstance()->getConnection($connName);
$manager = Doctrine_Manager::getInstance();
```

Records / Collections

```
setTableDefinition()
setUp()
hasOne('Model', $options);
hasMany('Model', $options);
$options = array('local' => 'local id', 'foreign'
=> 'id', 'refClass' => 'XrefModel');
hasColumn($name, $type, $length $options);
index($name, $options);
actAs('BehaviorName');
option($name, $value);
$record->toArray($deep = true);
$collection->toArray($deep = true);
$collection->getFirst();
$collection->getLast();
$collection->count();
$record->fromArray($array);
$collection->fromArray($array);
```

Schema Files

```
type: string(length)
length: integer
connection: conn name
package: PackageName
actAs: [BehaviorName]
validator name: name
autoincrement: true
columns:
 username: string(255)
relations:
 Phonenumbers:
  class: Phonenumber
  local: user id
  foreign: phonenumber id
  refClass: UserPhonenumber
  foreignAlias: Users
  foreignType: many
  type: many
```

Command Line Interface

./doctrine

```
Doctrine Command Line Interface
./doctrine build-all
./doctrine build-all-load
./doctrine build-all-reload
./doctrine compile
./doctrine create-db
./doctrine create-tables
./doctrine dal
./doctrine drop-db
./doctrine dump-data
./doctrine generate-migration
./doctrine generate-migrations-db
./doctrine generate-migrations-models
./doctrine generate-models-db
./doctrine generate-models-yaml
./doctrine generate-sql
./doctrine generate-yaml-db
./doctrine generate-yaml-models
./doctrine load-data
./doctrine load-dummy-data
```

Data Fixtures

./doctrine migrate

./doctrine rebuild-db

```

```

Doctrine Query Language

```
$query = new Doctrine_Query();
$results = $query->delete()->update()->set()->select()->distinct()
->forUpdate()->from()->leftJoin()->innerJoin()->where()->addWhere()
->whereIn()->whereNotIn()->orderBy()->groupBy()->addGroupBy()
->having()->addHaving()->addOrderBy()->limit()->offset()
->setHydrationMode();

$count = $query->count();
$results = $query->execute(array $params);
$firstRecord = $results->getFirst();
$lastRecord = $results->getLast();
$count = $results->count();
```

Validators

notnull, email, notblank, nospace, past, future, minlength(length), country, ip, htmlcolor, range(min, max), unique, regexp(expression), creditcard, digits(int, frac)

Migrations

up() down() preUp() postUp() preDown() postDown()

```
createTable($tableName, array $fields, array $options);
dropTable($tableName);
renameTable($oldTableName, $newTableName);
createConstraint($tableName, $constraintName, array $definition);
dropConstraint($tableName, $constraintName, $primary = false);
createForeignKey($tableName, array $definition);
dropForeignKey($tableName, $fkName);
addColumn($tableName, $columnName, $type, array $options);
renameColumn($tableName, $oldColumnName, $newColumnName);
changeColumn($tableName, $columnName, $type, array $options);
removeColumn($tableName, $columnName);
addIndex($tableName, $indexName, array $options);
removeIndex($tableName, $indexName);
```

Model Loading

```
$manager->setAttribute('model_loading', 'conservative'); // lazy loading
$manager->setAttribute('model_loading', 'aggressive'); // require_once all
spl_autoload_register(array('Doctrine', 'autoload'));
Doctrine::loadModels($models);
```
